user interface improvements, and updated hardware support.

**Desktop**  
SLED is built around the core components of SUSE Linux, including the popular YaST2 management system, the Xgl 3D graphics architecture, and the Beagle search tool. Service Pack 1 comes with improvements to the main window, updates to the control center, and an enhanced desktop effects engine. You'll also find enhanced versions of common desktop tools, including a custom Novell edition of OpenOffice.org that comes with extras such as an OpenXML/ODF translator.

**Virtualization**  
Virtualization has long been a priority at Novell, and SLED 10 builds upon

previous improvements. The recent emphasis on the popular Xen virtual machine monitor continues with enhanced Xen management and auditing tools.

**Security**  
The AppArmor security tool offers a practical approach to mandatory access control. Also included with this version are improvements to desktop lockdown utilities, as well as new tools for encrypting home directories and securing disk partitions.

**Try It**  
SUSE Enterprise Linux Desktop is Novell's sleek, stable, and practical desktop Linux system. Discover why SLED is the choice for many of Novell's biggest and most tech-savvy customers.

**HELP & SUPPORT**  
For a directory of SLED 10 documentation, see <http://www.novell.com/documentation/sled10>. For a summary of SLED forum options, see <http://support.novell.com/forums/2su3.html>. You'll also find answers and tips for working with SLED 10 at: <http://www.novell.com/cool solutions/sled>.
