

Internet THE RIGHT PAGES

When we're not hard at work producing the magazine, we like to spend our time searching out software and news on the Internet. In the office we all have our favourite bookmarks. Janet Roebuck sifts through some of the latest finds that we feel are important and useful

LINUX.COM

Linux Dot Com

<http://www.linux.com>

 A good portal site for all things Linux-based. The news section is from NewsForge. It has a nicely laid out Learn section with some good articles for all levels.

Linux Documentation Project

<http://www.linuxdoc.org>

 LDP's goal is to create the canonical set of free Linux documentation. It includes all the HOWTOs, manpages and guides.

Linux World

<http://www.linuxworld.com>

 LinuxWorld delivers hands-on technical information and real-world cases of Linux in the enterprise. It has features and assists for making purchasing decisions. LinuxWorld caters for enterprise technologists in need of products and consulting services that will solidify open source computing within their companies' infrastructure.

Linux International

<http://www.li.org>

 Linux International is a non-profit association of groups, corporations and others that work towards the promotion of growth of both the Linux operating system and the Linux community.

The Linux Kernel Archives

<http://www.kernel.org>

 This is the primary site for the Linux kernel source. It also has a nice deposit of free software not necessarily for Linux.

The Linux Counter

<http://counter.li.org>

 The Linux Counter Project is a non-profit organisation dedicated to monitoring the numbers and distribution of Linux usage. The more people that register the more we can see demand and present to companies. Statistics can be sorted by country.

Linux Central

<http://www.linuxcentral.com>

 A well-produced Linux portal with the emphasis on selling you Linux-related products.

Linux Apps

<http://www.linuxapps.com>

 A quick way to find a new application. The site is split into categories with a search function and applications can be sorted by either name or date.

TuCows

<http://linux.tucows.com>

The TuCows sites are enormous, with mirror sites everywhere to help reduce download times. The Cream of the Crop feature is a quick way to keep up with the latest and greatest utilities. *8.gif

UK portal

<http://www.linux.org.uk>

As Alan Cox maintains this site it is worth a visit. The portal engine provides all the news, but the best part is the diary. Actually there are two diaries and both are worth reading.

Power PC users

<http://www.linuxppc.org>

If you are using a PPC machine then this is your first port of call. The recent update list keeps you abreast of what has been ported and what's being worked upon.

Planet Linux

<http://www.linuxplanet.com>

The LinuxEngine is a nice search facility on this site. Along with the reviews section it's well worth a visit.

Games galore

<http://linuxgames.com>

Want to waste some time and need a new game? Then this is the site for you. Better yet are the HOWTO's for setting up a LANparty.

Start here

<http://www.linuxstart.com>

Linux Start is another search engine with a strong Linux focus. Applications are split by categories and the Web site is very clean and useable with easy to follow directions.

Fast search

<http://www.google.com/linux>

Direct your usual search by typing linux in the path name. This also works for mac andbsd.

Windows user?

<http://www.linuxnewbie.org>

If you're moving from Windows to Linux then this is the place for you. It has its own brand of help files written specially for newbies.

Programming news

<http://www.linuxprogramming.com>

Linux Programming is the portal site for all the news from the Web's other programming sites.

Routers

<http://master-www.linuxrouter.org:8080>

The Linux Router Project is small enough to fit on a single 1.44MB floppy disk, and makes building and maintaining routers, access servers, thin servers, thin clients, network appliances, and typically embedded systems next to trivial.
