

The best Web sites for Linux users

THE RIGHT PAGES

Linux Will Prevail

<http://www.linuxwillprevail.com/>

Help expedite the process of making GNU/Linux and its collection of Open Source software tools as good or better for the average user.

World of Mathematics

<http://mathworld.wolfram.com/>

Welcome to Eric Weisstein's World of Mathematics. Be careful – browsing here will cause days to disappear in wonder.

Maximum Performance

<http://www.maxpro.org/>

Get the maximum performance from your Mandrake Linux distro.

UserMode

<http://www.usermode.org/>

Here you'll find a wealth of information on *nix installations as well as a selection of Free Unix software.

Dot Gnu

<http://dotgnu.org/>

Dot Gnu is an Open Source project focused on developing programs that can communicate with each other via the Net, with the aim to create a competitor to Microsoft's .NET framework.

HamSoft

<http://radio.linux.org.au/>

HamSoft is an excellent Web resource featuring Linux software for the Hamradio community.

Linux for small businesses

<http://www.linux4smallbiz.com/>

Find out the benefits that Linux use could bring for your small business. You may need to use the scroll bars a lot on this site.

Debian Help

<http://www.debianhelp.org/>

Articles and news from Debian users. This site is dedicated to helping others use and understand Debian and is aimed at the typical user.

Linux/Unix tutorial site

<http://www.ctssn.com/>

Practical tutorials designed to speed up the Linux user and ease newbies into the world of the *nixes.

One page Linux manual

<http://homepage.powerup.com.au/~squadron/>

If you're after a one page summary of all the most common Linux commands then this (and perhaps a printer) is all you need.

Janet Roebuck sifts out the best Linux-related (and just plain interesting) Web sites to light up our browsers
