KNOW HOW

Web Filtering 40

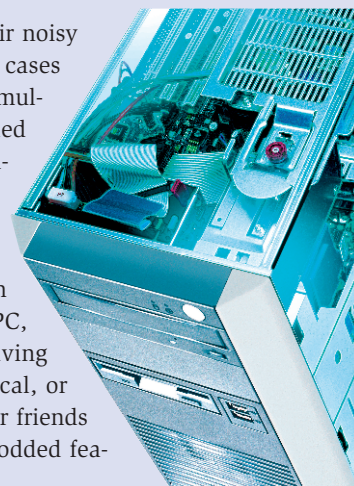

Kexi 44
The KDE Office suite has a new database front-end. Not just useful basic functions, the rewrite has brought new ideas.

Power Tools: Secrets 48
Linux has a wealth of command line tools. Everyone has their own personal favorite. We uncover some hidden gems, allowing you to gain the benefit.

Filesystem Tuning 50
You can make the most out of your computer by tuning your filesystems when you create and format them. Discover how to get the best from Ext3, JFS, ReiserFS and XFS.

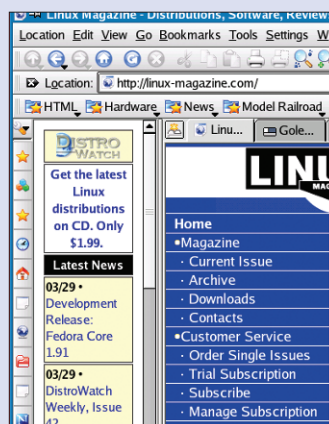

26 Quiet PC

Beige computers with their noisy fans and poorly designed cases do not make for a stylish multimedia station. We tried and tested many combinations until we found the best components. We help you to choose the parts so you can design and build your ultimate PC, whether it is for your living room where noise is critical, or just to be the envy of your friends with the most extreme modded features.

38 Konqueror 3.2

There have been a number of enhancements to the latest version of Konqueror 3.2, the KDE file manager and browser. This is a result of cooperating with Apple, whose Safari browser uses the same code base. We take a detailed look at this favorite tool to find out just what the new functions are, and show you how to get the best out of the new features, as well as exploring the long-awaited improved GUI.

40 Web Filtering

Advertising on websites can make it difficult to find your way around, apart from the fact that it consumes your bandwidth. If it is not banner adverts, then the next curse to browsing is the large images that are replacing headings. Content seems to be an afterthought on some sites. In this article, we look at the tools that are available to allow you to block the advertising banners on both your local machine and the machines on your local network.
