While this Linux Magazine DVD-ROM has been tested and is to the best of our knowledge free of malicious software and defects, Linux Magazine cannot be held responsible, and is not liable for any disruption, loss, or damage to data and computer systems related to the use of this DVD.

DEFECTIVE DVD?
We’re happy to replace defective discs. Unless your disc is clearly physically damaged (cracks, deep scratches), please check the data integrity on the DVD first.

Using the Linux command line please type in:

```
dd if=/dev/cdrom of=/dev/null
```

This process will take 10-15 minutes. If everything is OK you should see a message like:

```
1234567890 bytes in
1234567890 bytes out
```

If you don’t have a Linux system at hand, you can copy the entire disc contents to a temporary directory using any file manager. If everything is OK you shouldn’t get any error messages.

Provided the DVD passes the test, a replacement disc is not necessary. The problem is caused by an incompatibility between your machine and the Linux system you are trying to install.

For more information on how to resolve this, please consult the resources given in the “Help & Support” box in the DVD description on p3 in the magazine.

If you are trying to install Linux on a notebook, you can find additional support here:

http://tuxmobil.org/

If your disc is physically damaged and/or did not pass the above test, please email us your mailing address and note which DVD (issue month and year) needs to be replaced. We will then send you a replacement within a few days.

Send your feedback to subs@linux-magazine.com.

DVD BOOT
Place this DVD in the drive and restart your system. If your computer doesn’t start, make sure your BIOS is configured to boot from a DVD. Enter the BIOS setup menu (see your vendor documentation), make sure DVD boot is enabled, and make sure the DVD drive is before hard drive in the boot order.

Mandriva 2009

On This DVD:

- Mandriva 2009.1
- Debian 5.0.1
- Linux Kernel 2.6.29
- KDE 4.2.2
- Gnome 2.26.1
- Firefox 3.0.8
- Kaud 1.6.1
- Perl 5.10.0
- VirtualBox 2.2.0
- Iceweasel 3.0.6
- OpenOffice 3.0.1

ADDITIONAL RESOURCES

On This DVD:

- Mandriva 2009.1
- Debian 5.0.1
- Linux Kernel 2.6.29
- KDE 4.2.2
- GIMP 2.4.7
